

SCOPCLOUD IP PBX

OUR OFFERING

The ScopCloud IP PBX is our feature rich Hosted PBX solution. The hosted system allows your business to keep the focus on your customers and daily work, with the peace of mind of knowing that someone else is monitoring and managing your VoIP network.

TOP BENEFITS

MONTH TO MONTH CONTRACT

We do not believe in tying our clients into long and complicated contracts. Our model is designed to allow our clients flexibility

99.9% UPTIME

We guarantee that our network will be up and functioning 99.9% of the time per month. We feel a safety net of .1% each month allows us time for repairs and maintenance

ALWAYS UP TO DATE

Be rest assured you are always on the latest software version. This includes security fixes, bug fixes, enhancement upgrade, minor upgrades and major upgrades

SAVE ON HARDWARE AND SPACE

Eliminate the capex of buying your own server and other necessary equipment that keep this server running. You will ultimately have less racks in your server room

FLEXIBLE AND SCALABLE

increase and reduce users as you go. You don't have to pay for licenses that are not in use and you can easily add more users at any point without any hustles

SECURITY

Our Hosted PBX resides in a vault, connected to a network and IPs from which we host our services, giving us (and you) total control. We have all security measures in place to protect your data eg SBC
